LEARN AND APPLY

Are you experienced with HTML and CSS, JavaScript and databases, but want to expand your skillset to encompass all the different facets that make up full stack development? Join the **Full stack Developer (FSD)** course in **DXC University - Skillport** to learn and apply knowledge areas pertinent to the full stack web developer skills portfolio, including client-side and server-side technologies, persistence, and the web communication layer.

You will use cutting-edge technologies like Git, jQuery, Angular, Node.js and MongoDB, and build a real world application using the MEAN stack for your Capstone project.

This course is being taught LIVE. ENROLL today by following the instructions below for the **Full stack Developer (FSD) course** (with code LLDV0001).

FOUR FAST-PACED SESSIONS RUNNING MARCH 2019 IN ONE WEEK

- **April 8, 2019 @ 3.00 PM – 6.30 IST**: (Live) Session 1

- **April 9, 2019 @ 3.00 PM – 6.30 IST**: (Live) Session 2

- **April 10, 2019 @ 3.00 PM – 6.30 IST**: (Live) Session 3

- **April 11, 2019 @ 3.00 PM – 6.30 IST**: (Live) Session 4

How to ENROLL

1. Click this link to view the details in DXC University: https://csc.skillport.com/skillportfe/main.action?path=summary/LP/LLDV0001
2. Click the "ENROLL" button beside the title and add it to your Learning Plan.
3. Join the sessions by accessing the course at the required times and days (**check the calendar for class times here**):
   a. Search for the course using the course code "LLDV0001" or click here.
   b. Expand the **Session** you intend to join. Next, expand **Classroom** and then expand **Live Classroom.**
   c. Click on the **Live Session…** link. If your class is in progress or starting within the next 45 minutes, a **Join** link will appear. Click the **Join** link to participate.
